  android:layout_height="match_parent"
  android:orientation="vertical"
  tools:context=".MainActivity">
```

<TextView

```
  android:id="@+id/tv1"
  android:layout_width="match_parent"
  android:layout_height="wrap_content"
  android:textSize="20dp"
  android:text="Send Email"
  android:textStyle="bold" />
```

<!-- Edit text for email id -->

<EditText

```
  android:id="@+id/et1_emailid"
  android:layout_width="match_parent"
  android:layout_height="wrap_content"
  android:layout_marginTop="30dp"
  android:layout_marginEnd="22dp"
  android:hint="Enter you email id"
  android:inputType="textEmailAddress"/>
```

<!-- Edit text for email subject -->

<EditText

```
  android:id="@+id/et2_emailsub"
  android:layout_width="match_parent"
  android:layout_height="wrap_content"
  android:layout_marginTop="20dp"
```

```
        android:hint="Enter you email subject"
        android:inputType="textEmailSubject"/>
    <!-- Edit text for email body -->
    <EditText
        android:id="@+id/et3_emailmsg"
        android:layout_width="match_parent"
        android:layout_height="200dp"
        android:layout_marginTop="30dp"
        android:ems="100"
        android:hint="Enter you email message"
        android:inputType="textLongMessage"/>
    <!-- Button to send email -->
    <Button
        android:id="@+id/btn_Send"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginLeft="76dp"
        android:layout_marginTop="20dp"
        android:text="Send email!!" />
</LinearLayout>
```

MainActivity.java

```
package com.example.email;
import android.annotation.SuppressLint;
import android.content.Intent;
import android.net.Uri;
import android.os.Bundle;
import android.widget.Button;
import android.widget.EditText;
import androidx.appcompat.app.AppCompatActivity;
public class MainActivity extends AppCompatActivity {
    // define objects for edit text and button
    Button button;
    EditText sendto, subject, body;
    @SuppressLint("MissingInflatedId")
    @Override
    protected void onCreate(Bundle savedInstanceState) {
```

```
super.onCreate(savedInstanceState);
setContentView(R.layout.activity_main);
// Getting instance of edittext and button
sendto = findViewById(R.id.et1_emailid);
subject = findViewById(R.id.et2_emailsub);
body = findViewById(R.id.et3_emailmsg);
button = findViewById(R.id.btn_Send);
```

```
// attach setOnClickListener to button with Intent object
define in it
```

```
button.setOnClickListener(view -> {
    String emailsend = sendto.getText().toString();
    String emailsubject =subject.getText().toString();
    String emailbody =body.getText().toString();
    // 1. define Intent object with action attribute as
ACTION_SEND
    Intent intent = new Intent(Intent.ACTION_SENDTO);
// add three fields to intent using putExtra function
// 2. Set the data to mailto: (this restricts it to email apps
only)
    intent.setData(Uri.parse("mailto:"));
```

```
//3. Put all the extra values for mailid,subject and email body
intent.putExtra(Intent.EXTRA_EMAIL, new
String[]{emailsend});
intent.putExtra(Intent.EXTRA_SUBJECT, emailsubject);
intent.putExtra(Intent.EXTRA_TEXT, emailbody);
```

```
// startActivity with intent with chooser as Email client using
createChooser function
```

```
startActivity(Intent.createChooser(intent, "Choose an Email  
client :"));  
});  
}  
}
```
